### **EXPERIENCE**

March 1988 To Present Independent geologist doing business as JATEX Oil & Gas Exploration. Inc. and consulting for small and major independents. Eighteen years of prospect screening, evaluation and generation with an in depth exposure to all phases of petroleum development. My diversity of field experience qualifies me to be able to oversee a prospect from generation through completion.

Geology: Prospect generation and evaluation, field experience, log interpretation for completion and behind pipe potential, reservoir interpretation and modeling, regional mapping and cross-section, technical reports and prospect packaging.

Engineering: Economic evaluations, decline analysis, reserve potential, drill stem test evaluation, stimulation, evaluation of re-entry potential, firm understanding of various completion and production methods.

Land: Lease negotiation and acquisition. Full understanding of the economic and legal ramifications of various lease requirements.

June 1983 - March 1988 Marathon Oil Company, geological technician – development group  
Duties included screening prospects, evaluating properties for development potential and farmout requests. Prospect generation.

### **EDUCATION**

Bachelors Degree of Science in Geology with a minor in Business Management, University Of Texas Of The Permian Basin. Additional classes in petroleum engineering and business law.

### **LEADERSHIP EXPERIENCE**

- Independent geologist, project manager, oil & gas operations
- President various booster clubs, active in several professional and civic organizations
